Teacher Professional Development

Blended Learning in Engineering February 2021

In this online event, we will explore the teaching, learning and assessment of the *Materials Testing* topic through a Flipped Classroom Model of Blended Learning.

A panel of practicing teachers will demonstrate how they have adopted a blended-learning approach to their teaching and assessment of theory topics in Engineering and how this has supported their students in developing their understanding and their capacity for independent learning. The role of note taking in engaging students with digital resources will be discussed.

During the event, an opportunity will be provided to engage in dialogue with peers through small group discussions.

The webinar will be hosted via Zoom. All wishing to attend must register in advance at www.pdst.ie/onlinebooking. Further instructions on how to attend the event will be emailed to those who register. Bookings will close the day before the event or when the event is fully booked. Only those who register will have their CPD record updated after attending the event.

Date	Time	Event
Wednesday 3rd February 2021	7:30 pm — 8:30 pm	Blended Learning in Engineering
Tuesday 9th February 2021	4:00 pm — 5:00 pm	Blended Learning in Engineering

Book your place online only at www.pdst.ie/onlinebooking

Places will be allocated on a first come first served basis so book early to avoid disappointment
