

Windows XP & the Student Design Kit

Questions: Are there copies of the 2009 SDK available?

Answer: The SDK is updated by SolidWorks on an annual basis and older versions of the software are no longer supported. Please note that from August 2015 the versions of the SDK available are the 2014/2015 and the 2015/2016 versions. The 2015 version is for 64 bit computers, but the 2014 versions are available in both 32 & 64 bit.
