

## Windows XP & the Student Design Kit

---

**Questions:** Can I get copies of the Student Design Kit (SDK) that will work on XP Computers?

**Answer:** No. The Windows XP Operating System is no longer supported by the Student Design Kit. The SDK versions available to download will work on computers running Windows 7 or Windows 8. It may run on Windows 10, but it is not currently supported. SolidWorks 2015 will only work on 64 bit computers, while SolidWorks 2014 has both a 64 bit and 32 bit option. From 2016 onwards the SDK will only work on 64 bit computers and support for Windows 10 will be provided.
