Teacher Professional Development

Using a VLE as a Digital Workspace in Engineering

March/April 2021

This event is organised in response to teacher feedback and builds on the approaches utilised in the previous *Blended Learning in Engineering* online workshops.

In this event we will explore effective and efficient use of Virtual Learning Environments (VLEs) as a workspace for the teaching, learning and assessment of Engineering. A panel of practicing teachers will demonstrate how they use their VLEs in the following areas:

- The distribution of assignments in a manner which supports students building an organised class notebook and portfolio of work

- The use of rubrics to establish and communicate expectations with students

- Efficient methods for reviewing student work and providing formative feedback through verbal comments, stylus comments and typed text feedback.

During the event, an opportunity will be provided to engage in small-group discussion with peers.

The webinar will be hosted via Zoom. All wishing to attend must register in advance at www.pdst.ie/onlinebookings. Further instructions on how to attend the event will be emailed to those who register. Bookings will close the day before the event or when the event is fully booked. Only those who register will have their CPD record updated after attending the event.

Date	Time	Event
Wednesday 24th March 2021	4:00 pm — 5:00 pm	Using a VLE as a Digital Workspace in Engineering
Wednesday 14th April 2021	7:30 pm — 8:30 pm	Using a VLE as a Digital Workspace in Engineering

Book your place online only at www.pdst.ie/onlinebooking

Places will be allocated on a first come first served basis so book early to avoid disappointment
