Web: <http://www.techsoft.co.uk/>

Questions: Has T4 any recommendations regarding Visualizer models suitable for schools?

Answer:

As a support service we are prohibited from recommending equipment from individual manufacturers unless they have gone through a procurement process. Here are some points you might bear in mind when making your decision on which visualizer to buy:

- What is the capture area? We would recommend that it is capable of capturing a full A3 image.
- Has the unit built in illumination?
- Can the unit be controlled with a Remote control unit? Not necessary, but can be useful.
- What is the Zoom range, has it auto zoom and auto focus?
- Has the unit Image freeze capability? Can you take snapshots of the image?
- Can the unit blank or mask a portion of the image?
- How portable is the unit?
- What warranty is supplied with the unit?

These are guidelines only and individual visualizers will have other different functions & capabilities.
