

Intermediate SolidWorks Webinar

April 2021

This webinar aims to support teachers who have beginner to intermediate knowledge of SolidWorks, and who wish to upskill in the basic elements of SolidWorks modelling. Participants will explore how an understanding of the geometry of an object supports the creation of the object in SolidWorks. Effective use of various features, such as *Loft* and *Indent*, will be highlighted.

This webinar will comprise two sessions. The first session will focus on sketching the geometry of an everyday object in preparation for creating the object in SolidWorks. A panel of practicing teachers will demonstrate their approach to the creation of the object; outline the value of exploring its geometry and describe how annotated sketches can support a more efficient approach. Participants will be given the chance to try out this approach in small, breakout groups. With this in mind, participants are advised to have sketching equipment to hand for the webinar.

In the second session, the sketches developed will be used to support creating the object in SolidWorks, bearing in mind efficient use of the relevant features.

The webinar will be hosted via Zoom. All wishing to attend must register in advance at www.pdst.ie/onlinebookings. Further instructions on how to attend the event will be emailed to those who register. Bookings will close the day before the event or when the event is fully booked. Only those who register will have their CPD record updated after attending the event.

Date	Time	Webinar
Tuesday 20th April 2021	7:00 pm — 8:30 pm	Intermediate SolidWorks Webinar

Book your place online only at www.pdst.ie/onlinebooking

Places will be allocated on a first come first served basis so book early to avoid disappointment
